

Reflection on Sprint # 1

User Story	Task	Task Assigned To	Estimated Effort per Task	Actual Effort per Task	Done(yes/no)	Notes
Exercise 1						
-As a developer I want to use Responsibility Driven Design and CRC	- Derive classes, responsibility and collaborations starting from requirements.	Ravi	3 hours	3,5 hours	yes	none
-As a developer I want to distinguish main classes from less important classes	- Describe main classes. And distinguish from less important classes.	Jasper	3 hours	3 hours	yes	
	- If necessary change, merge or remove non-main classes with main classes.	Jasper	3 hours	2 hours	yes	Found none
- As a developer I want a class diagram of all main elements.	- Draw diagram of main classes.	Faysal	3 hours	1 hours	yes	
- As a developer I want a sequence diagram that describe how main elements interact with on another.	-Draw sequence diagram.	Faysal/Ravi/Kamran	3 hours	4 hours	yes	was way more difficult than expected
Exercise 2						
- I want to use Parametrized classes	- If necessary, describe all parametrized classes in the project and the benefits of them. If not, describe why they aren't there.	Jasper	3 hours	2 hours	yes	
- I want to make hierarcies and classify them.	- Draw the class diagrams for all the hierarchies in your source code. Also explain why they exist and classify them.	Faysal	5 hours	3 hours	not sure	none
Excerise 3						
- As a developer I want to log various user actions that are relevant.	- Specify requirements and implement them.	Kasper Kamran Ravi	20 hours	10 hours	yes	

Main Problems Encountered

Problem 1

Description: Some of the exercises were not done. Because it was not explicitly told in the sprint plan

Reaction: No points for that particular exercise

Adjustments for the next Sprint Plan

- Not underestimate work.
- Specify who is doing which exercise of the assignment
- Better communication
